

MLC MasterKey Unit Trust – MLC Australian Share Index Fund

Target Market Determination

This Target Market Determination (TMD) describes the investors that make up the target market for this fund and sets out some other matters relevant to the fund's distribution and review. This document is available to the public free of charge. It doesn't form part of the Product Disclosure Statement (PDS) for the fund and it doesn't list all the fund features or terms. The information in this document doesn't take into account any person's individual investment objectives, financial situation or needs. Investors should read the PDS before making any decision regarding the fund.

Section 1 – Target Market and Product Features

An investor who satisfies the following is in the target market for the Fund:

- wants to invest in a portfolio of Australian shares managed by a specialist index (passive) manager that produces similar returns to the S&P/ASX 300 Total Return Index;
- wants diversification across the many different industries and companies that comprise the S&P/ASX 300 Index;
- wants long-term growth in the value of their investment, and some income;
- understands there can be very large fluctuations in income and the value of their investment; and
- who wants to invest either:
 - indirectly, through MLC MasterKey Investment Service or another 'platform product' we approve (such as an investor-directed portfolio service); or
 - directly, by application to us provided the investor currently holds an investment in a MasterKey Unit Trust fund.

The Product Features of the Fund are set out in the table below:

Please note, if an investor intends to hold this Fund as part of a diversified portfolio, the Fund should be assessed against the investor's requirements for the relevant portion of the portfolio, rather than the investor's requirements for their portfolio as a whole.

For example, an investor may seek to construct an overall conservative portfolio which includes an allocation to a higher risk investment. In this case, it may be likely that an investment with a higher risk/return profile is consistent with the investor's requirements, even though the risk profile of the investor overall is lower than the investment selected. In making this assessment, please consider all Product Features.

Product Features	Details
Investment objective	
Capital growth	The Fund is designed for investors looking for capital growth by investing in a Fund that aims to match the return of the S&P/ASX 300 Total Return Index, before taking into account fees. It achieves this by holding securities in the Index, allowing for individual security weightings to vary marginally from the Index from time to time.
Product use as a percentage of an investor's portfolio	
Core Component (25-75%)	The Fund is designed for use as a core or satellite component of an investor's broader portfolio of investments.

Product Features	Details
Satellite (<25%)	
Investment timeframe	
Long term	The Fund is designed for investors who are looking to make a long-term investment, with at least a 7 year timeframe.
Risk and return	
Very high risk & return	The Fund is designed for investors seeking the potential for higher returns and are willing to accept very high risk (estimated as 6 or more negative annual returns in any 20 year period).
Redemption frequency	
Daily	In normal circumstances, the Fund processes withdrawals each business day. For further information refer to the PDS.

Section 2 – Distribution Channels and Conditions

Distribution Channels	Distribution Conditions
